

**Bass Preamp v.1** is an Analog Tube Bass Preamp.

*“Get ready from Jazz to Funk Rock slap...”  
what ever your Bass Guitar, single coil or humbucker.*

ON OFF Switch	: For Preamp Activation.
HARD SOFT Switch	: For Preamp Tone Character.
X-TRA Lo Switch	: For Additional Lo Body.
X-TRA Hi Switch	: For Additional Hi Body.
TUBE Switch	: For Tube Type Selection (Solo or Dual).
CABINET Switch	: For Cabinet On or By pass.
DRIVE IN knob	: Preamp Input Section (Gaining).
SHAPING knob	: For Shaping Signal, HI focus.
TONE knob	: For Toning Signal, LO focus.
BASS knob	: Bass Tone Controller.
MID knob	: Mid Tone Controller.
HI knob	: Hi Tone Controller.
VOLUME	: Master Output Controller.

Click Vendor Email Label to go to Vendor info and notes.

**Note:**

Avoid Peak as possible, from your signal input to output signal of the plugin and TRUST YOUR EAR. All the Default setting is the recommended starting point of the sound. Turn down your audio system volume to prevent any damage.

The preamp is applicable for any player and recording engineer.

Big thanks to Christian Budde Analyzer, Ronnie & [rekkerd.org](http://rekkerd.org), people in kvraudio.com forum, Knobman, any digital recording forum, literature on internet and people who direct and indirect help me!

Update: Remove VU For Slimmer Size, Tube Selection Added, Tone Character Added, Subtle the X-TRA and The New Concept of Tone Stack.

Thanks GOD still giving me “imagination and passion”.
